

TAGARNO FHD ZIP
IMPROVE EFFICIENCY WITH A DIGITAL MICROSCOPE

TAGARNO FHD ZIP

IMPROVE EFFICIENCY

A SIMPLE SOLUTION

With TAGARNO FHD ZIP, you have a simple, but high quality microscope that can be used for tasks with low magnification needs.

MAGNIFICATION UP TO 53X

With FHD 30x optical zoom, the depth of field is significantly improved and the user has a better overview at minimum zoom compared to other cameras on the market. 30x optical zoom with a +4 lens also enables higher magnification at maximum zoom.

HIGH QUALITY IMAGE DISPLAY

With 1080p image quality, 60 frames per second and 30x optical zoom, what you see on the monitor is exactly what is under the camera - without distortion or delay.

DOCUMENT YOUR WORK

With TAGARNO FHD ZIP, you can stream and store uncompressed live video on a computer, using a third party software. The captured video can then be forwarded to any supply chain partner for improved communication. The captured video can be then be forwarded to any supply chain.

REDUCE SICK LEAVE DAYS

As the digital microscopes do not depend on an ocular for focusing, your eyes, neck and back are relieved of unnecessary strain. This creates more adequate, efficient and less tiring work processes.

Dimensions	H: 350 mm / 13.78"	W: 155 mm / 6.10"	D: 386 mm / 15.20"
Weight	2.0 kg / 4.4 lbs		
Camera resolution	FHD 1080p, 1920x1080p at 59,94/50/29,97/25Hz		
Camera zoom	30x optical		
Work height	250 mm / 9.84"		
Work depth	280 mm / 11.02"		
Lenses	+4 (included)	1.7x - 53x	
Field of view	X-direction: 10.5 mm - 290 mm / 0.41" - 11.42"		
	Y-direction: 5.91 mm - 163.1 mm / 0.02" - 6.42"
