LYNX Test Program for PACKAGING and PACKING COMPRESSION

"Data in Real Time..."

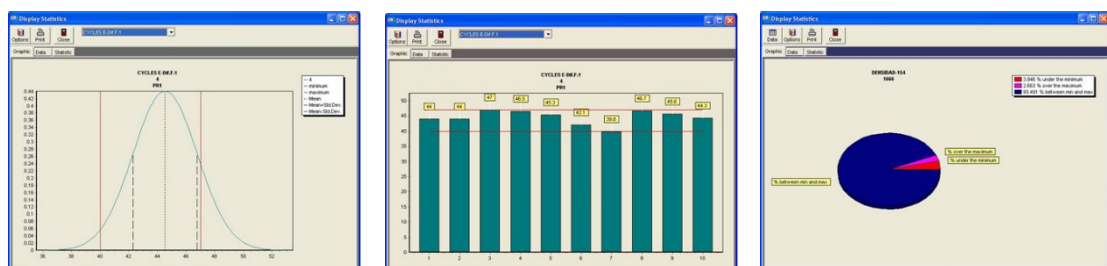

- ❑ Enhances quickness in carrying out tests and in obtaining results.
- ❑ Reduces human error.
- ❑ Traceability according to ISO 9000
- ❑ The software records minimum, maximum, and median value as well as standard deviation
- ❑ Up to 100 tests of measurement capacity for each report
- ❑ SAVE, PRINT and COPY to Office Clipboard functions

When combining this test software with your compression system, it is possible to perform box crush tests, constant load compression, and cyclic compression tests. Machine operation is managed via the software, and all data is captured with the software. The data is displayed in real time on your monitor, and then saved and can be retrieved easily in the future.

INCLUDED: LYNX Management Module with Basic Statistics

The LYNX Management Module allows you to manage the data generated, choose the interface language, and prepare and print reports (that you can customize with your logo). You can also change the units displayed, as well as change user accounts and passwords. You can also record the minimum, maximum and optimal values to manage data with statistics, charts bars, GAUSSEN Bell, tolerances comparatives and export this data to Word, Excel, PDF and more.
